

**FLORIDA HEART ASSOCIATES, PL
NON-INVASIVE IMAGING DEPARTMENT
NUCLEAR MEDICINE RN/LPN - PRN**

JOB TITLE: Nuclear Medicine RN/LPN – PRN

REPORTS TO: Director – Non-Invasive Imaging

JOB CLASSIFICATION: Non-Exempt

GENERAL DUTIES: Educate patients and verify preparations for nuclear/regular stress testing, operate stress test equipment. Monitor stress testing with the cardiologist and administer medications, team leader in emergency situations, communicate with doctors regarding patient care, help to coordinate nuclear doctor schedules, communicate nuclear and echo study test results with patients and referring physicians, and liaison between scheduling and nuclear medicine departments.

TYPICAL PHYSICAL DEMANDS: Requires full range of body motion including handling and lifting patients, manual and finger dexterity and eye-hand coordination. Requires standing and walking for extended periods of time. Requires corrected vision and hearing to normal. Minimal exposure to communicable diseases and bodily fluid is expected. Exposure to radioactive materials when in the presence of patients is also expected.

ESSENTIAL DUTIES: Critical features of this job are described under the headings below. They may be subject to change at any time due to reasonable accommodation or other reasons.

1. Educate patients and verify preparation for nuclear/regular stress testing.
2. Start IV's and obtain informed consents for testing.
3. Prepare patients for stress testing: Check I.V. patency, attach ECG leads, set up ECG machine, prepare forms, review patient's history with cardiologist, take patient's blood pressure and record pre-test results.
4. Assist cardiologist with patient's stress test: Operate ECG machine and treadmill, monitor patient's blood pressure and record results on the face sheet, be able to recognize dysrhythmic events and communicate observed events with the cardiologist, remove ECG leads following the patient's recovery and dismiss patient at the direction of the cardiologist.
5. Administer medications as directed by the cardiologist.
6. Responsible for calling patients with nuclear/regular stress and Echo/Vascular results.
7. Responsible for patient follow-up: maintain log of patients tested (nuclear medicine lab worksheet) which contains interpreting physician's hand-written impressions and use this worksheet to document follow-up phone calls to the patient and doctors.
8. Assist in the Nursing Clinic.
9. Assist with triage duties and authorizations as needed.
10. Administer nursing care as needed.
11. Function as a team leader in emergency situations.
12. Responsible for maintaining crash cart: check medications inventory, replace expired medications, and test defibrillator.

**FLORIDA HEART ASSOCIATES, PL
